Advanced Messaging & Communications Intelligence Service

Part of the Digital Consumer Services Service Area Package
Global, in-depth coverage of all types of consumer communication platforms. Analysis of telco platforms including P2P and A2P SMS and RCS, and of the major OTT platforms including users, traffic and revenues.

“Communications is entering a new visual era, with three out of five chat app users now regularly making video calls. The COVID-19 pandemic is accelerating the trend towards ingrained use of video calling among consumers.”

Pamela Clark-Dickson
Principal Analyst
HOW OMDIA HELPS YOU

- Size the telco and OTT messaging markets using country-level forecasts
- Size the consumer VoIP and video calling markets using country-level forecasts
- Track developments in the OTT Messaging, Social Media, and Enhanced Telco Communications Services markets using detailed data trackers
- Analyse multi-country surveys to identify how consumers use communications

KEY QUESTIONS ADDRESSED

- What is the size of the telco messaging market, for P2P and A2P SMS, and RCS?
- What is the size of the messaging app market, for users, traffic and revenues?
- Who are the key communications app players, and what is their market share for users and messaging traffic in key countries?
- How fast is app-based consumer VoIP and video calling growing, and who are the key players?
- How are key social media players addressing issues such as data privacy and the spread of misinformation on their platforms?
- What are the key platforms and technologies in the business-to-consumer messaging and communications market?
- What role does CPaaS play in B2C messaging and communications?

How consumers typically access customer care functions from service providers

# Advanced Messaging & Communications: Market Data & Analysis

## OTT Communications Tracker

Global KPIs and two-year projections, news announcements and service overviews for key communications app players

### DETAILS
- **Frequency:** Bi-annual
- **Measures**
  - Registered users
  - Monthly active users
  - Messaging traffic
  - Revenues (where available)
  - Country splits for MAUs and messaging traffic by player

### COVERAGE
- **OTT Communications App Players**
  - Facebook – WhatsApp, Facebook Messenger, Instagram
  - Tencent – WeChat
  - Kakao Daum – KakaoTalk
  - Line
  - Apple – iMessage
  - Microsoft – Skype
  - Snap – Snapchat
  - Rakuten Viber – Viber

### Regions
- Worldwide

## OTT Messaging Forecasts

Worldwide, regional and country market sizing for OTT communications apps

### DETAILS
- **Frequency:** Annual
- **Measures**
  - Registered users
  - Monthly active users
  - Messaging traffic (text, picture, video)
  - Mobile
  - Fixed

### COVERAGE
- **OTT Messaging Users**
  - Registered users
  - Monthly active users

## Mobile Messaging Traffic and Revenue Forecasts

Five-year forecasts for telco mobile messaging traffic and revenues

### Details
- **Frequency:** Annual

### Coverage
- P2P SMS traffic
- P2P SMS revenues
- A2P SMS traffic
- A2P SMS revenues
- MMS traffic: picture, video

### Regions/Countries
- Africa
- Asia
- Europe
- Latin & North America
- Middle East
- Worldwide

## Consumer VoIP and Video Calling Forecasts

Five-year forecasts for consumer VoIP and video calling users and traffic (video calling new in 2020)

### Details
- **Frequency:** Annual

### Coverage
- **Consumer VoIP**
  - VoIP traffic: domestic and international
  - VoIP users: fixed and mobile

- **Consumer Video Calling**
  - Video calling traffic: domestic and international
  - Video calling users: fixed and mobile

### Measures
- VoIP traffic
- VoIP users
- Video calling traffic
- Video calling users

The Future of Consumer Communications

Providing detailed analysis around the continuing development of communications apps and services

DETAILS

Frequency: Annual

This report explores topical developments in-depth, such as 5G and video communications. It is based on interviews with key stakeholders in the communications apps and services market, including Tier 1 telcos and vendors. It also uses data and insights drawn from Digital Consumer Insights surveys, market trackers, and forecasts.
## PRODUCT OVERVIEW

### Mapping the new communications landscape

*Providing detailed analysis around the continuing development of communications apps and services*

Series of reports and trackers evaluating chat apps as they continue their march towards world domination. App-based messaging is nearing saturation levels in many markets, and chat app users have seized on video as their new favourite way to communicate. The use of video communications has soared during the Covid-19 pandemic, and Omdia expects that video comms will remain an important channel for consumers after social and travel restrictions ease. The fragmentation of chat apps means that telco voice and SMS persist, paving the way for telecom companies to also succeed with RCS. In 2020, Omdia will focus on the continuing evolution of telco and OTT communications, exploring the implications for consumers and the wider industry, and underpinning its analysis with forecasts, trackers, and consumer surveys.

### Vendors are the lynchpin of the new communications world

*Assessing how vendors and service providers are evolving to meet market challenges.*

The pressures on communications vendors and service providers have never been higher. Telcos expect more for less. To generate additional revenue, vendors and service providers have to demonstrate commensurate value. In 2020, Omdia will continue to track developments in the vendor and service provider market, assessing the strategies of CPaaS providers, SMS aggregators, and others.

### The rich new world of A2P communications

*Analyzing how changing communications behaviors drive adaptation in the platforms underpinning B2C interactions.*

SMS aggregators and vendors are providing enterprises with more choices than ever in how they communicate with consumers, while adapting their platforms to keep pace with how consumers’ communications behaviors are changing. Enabling enterprises to access new channels for application-to-person (A2P) communications has implications for telecoms companies as well. In 2020, Omdia will continue to analyse the A2P market, tracking and evaluating the role of RCS within the context of SMS and chat apps, and assessing the strategies of the key stakeholders as they transition to providing richer communications.

### Social media platform strategies

*Evaluating the market sizing and go-to-market strategies of key social media players*

Social networks are now an intrinsic part of consumers’ lives. However, they are always evolving to add new and better services, monetization features, and infrastructure, making them a moving target to compete or partner with. Their challenges, which range from regulation to data security and privacy, as well as consumer protections, are similarly shifting. In 2020, Omdia will track and analyze social media players as well as evaluate the size of the global social media market.
