Security Operations for Industrial IoT	Hollie Hennessy	Oct-22
Private LTE and 5G Networks for European CSPs	Pablo Tomasi	Nov-22

Principles

- The Omdia Universe is our flagship Vendor Selection methodology designed to robustly and holistically assess key vendors in growing and established technology markets. It evaluates and makes recommendations based each vendor's capability and (with the help of our partner TrustRadius) the experience customers have had with their solution.
- The Omdia Market Radar is designed to evaluate vendors in emerging technology areas. It evaluates the vendors' capability, but is less orientated to market momentum and customer experience due to the technology's relatively nascent status.
- A full list of Omdia's published vendor assessment research is can be found [here](#)

FOR FURTHER HELP

All Omdia Vendor Assessment reports are available to end-users via our Enterprise Technology Advisory Service. For inquiries about this service or feedback on our publication schedule, please contact:
