Decision Matrix	Enterprise ML Development Platform	Michael Azoff	Mar-20
	Hyperconverged Infrastructure Solution	Roy Illsley	Jun-20
	Multichannel Cloud Contact Center Solution	Ken Landoline	Jul-20

The above was updated 15th Dec 2020

Principles

- The Omdia Universe is our flagship Vendor Selection methodology designed to robustly and holistically assess key vendors in growing and established technology markets. It evaluates and makes recommendations based each vendor’s capability and (with the help of our partner TrustRadius) the experience customers have had with their solution.
- The Omdia Market Radar is designed to evaluate vendors in emerging technology areas. It evaluates the vendors’ capability, but not customer experience due to the technology’s relatively nascent status.
- Omdia’s portfolio also includes reports based on legacy Ovum and IHS Markit methodologies (Decision Matrix and Scorecard respectively).

FOR FURTHER HELP

All Omdia Vendor Assessment reports are available end-users via our Enterprise Decision Maker Intelligence Service. For inquiries about this service or feedback on our publication schedule, please contact:
